

Military training. A practical approach.

(Beta version)

- **Psychological conversion to reality** perception and living in presence: 1-2 weeks in the forest.
- **Training on terrorists and enemies** rather than „passive” military exercises. Better focus and exposure to real enemies in a practical way.
- **„Banking” towards confrontation.** Cyber-geography(CAD), muds and geo information technology (GIS) technology vs. Cyber-hype. Computer aided management(CAM) and Artificial intelligence(AI).

Self establishing base rules:

- Never support or credit the other side. Anything can be used against you. Always “bank” towards the combat zone or yourself. The world is a bank, we are building and “working on” a bank, regulated by democracy.

- If not sure about something, do not do it! Save the day!
- The ability to fix things is golden path. Do not trade a used path for a risky unknown one.

- The best victory is a one that let go by law, rather than force. Force has remarks, void is golden in respect of peace and prospects. Democracy and politics leaves remarkable fingerprints in war and history too.
- Law and physics (military) should solve the problems. Law is the only way to go (legal or physical etc). If an entity does not respect law, what chances we have of progress ahead?
- If not sure about what directions to take or choose. Go for power and higher numbers. By having resources and power, you have choices left. But if you lose on numbers and power, your options will be numbered too. Answers will come, resources and power are priority.
- The leadership. When trouble turns in and things turn out questionable, why “trade for the situation” and let backwards? Have to take leadership, and system, order will take care of the problems. If you keep control, control can take care of problems. But if you lose the control, what will take care of the problem? System and order works as well as control.
- Military wise, the smallest information comprise of a signal. The next military unit after a signal is an event. See also wave interference and systems theory.

Military tip:

<u>Layers:</u>	<u>Military units:</u>
• Physical	• Signal
• Logical	• Events
• Chemical	• "Polynomial units" ⇒ Real world/thinking
• Biological	• System status
• Legal	<div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> ⇒ Formula of relativity (relations) ⇒ Tensor equations (containers of values) </div>

Ref: Military is always concerned about oil and nuclear power as conflict matters. Democracy engineered in universal terms aka. polynomial units differentiated off the real world by abstraction.

Spatial intelligence and nuclear power.

Let's say that (Ref: DemonDSP chip Ver 3.2, Theory of Evolution Ver 2.3.8, Artificial Intelligence Ver 2.5, <http://fugeeonline.com/>) we can conclude, that terrorist cell networks breed on democracy by exploiting the plasma being unprotected in a parasite way. Meaning, that the plasma (Holy spirit) that protects our democracy is basically unprotected and exposable. With this in mind, using and living off the plasma and replicating every possible form of defense to maintain equilibrium justice in the world. In other words.

Hell based terrorist cell networks breed and replicate on our democracy (supported by the Holy spirit, Ref: plasma) in a parasite way. Yet terrorizing and sabotaging our society and democracy.

Subject matters: terrorism, hell, democracy, Holy spirit(plasma), mesons, charm particles, quarks, evolutionary processes, genetic algorithms, energy, psychology, conflict, reality, perception.
