

# Passport to the cosmos. Salvation by artificial intelligence(AI)

(Gamma( $\gamma$ ) version 2.9.8 under revision)

## Re-definition of artificial intelligence(AI):

Practically talking, AI is maximizing knowledge out of a given set of knowledge. By AI we do not just mean negation of information values but the process of maximizing it. Hence the word completeness. Once we achieved a complete set of knowledge of a given set of knowledge set, then we can say that we have the complete knowledge set that can relate back to the base knowledge set. AI acts as a differential engine similar to differential gears in vehicles.

## Hypothesis of theory of evolution:

There is a suspicion that eternal evolution happens in a self driven way. Meaning that resources, dependencies and structure of the 3D ether, space for life is "rendered out" based on dependency to eternal evolution forward in time. In practical physical terms, this means that constructive interferometry is applied in the Coulomb charge field in which energy chunks interfere with one another. Thus, creating or destructing processes of forward eternal evolution. Similar to genetic algorithms determined by the "chromosomes/genetic algorithms" of the given system that describe its characteristics.

By eternal forward evolution, we mean that resources, dependencies and structure of the 3D ether are rendered out based on constructive interferometry in respect of the complete system. This raises the concern of the presence of both life and anti-life. This theory therefore assumes that catalyst and non-catalyst particles (God and hell particles etc.) are created and destroyed along the time axes of this eternal evolution. See also charm quarks ( $\rightarrow$ kinetic composite functions etc.) or photon and anti-photons. Similar to occurring and disappearing species in ecology for example. So what we talk about basically is a purely dependency driven system; in which only the forward time axis of eternal evolution matters. One note that author may make. By system theory, no matter which law you start following, you will end up with the same system of complete existence based on constructive interferometry. This means that presence of law in the world itself defines a world which is based on law. Hence, without

Ref: Monogramme of Christ

law, the world can not exist and can not be described.

At the same time, any error in existence creates a constructive interferometry ripple effect which automatically folds forward again. Hence, the presence of law in the worlds itself defines completeness of existence. “In the Lord we trust.” It is also assumed that

anti-life is a non-constructive form of existence in respect to the complete system. Such forms of existence typically include pesticides, parasites and viruses etc. The importance of the theory of evolution is that we can now plan several factorial simple

on longer range projections of complex systems. Theory of evolution therefore also depends on system theory. Meaning that simpler principle and better understanding of spatial/organic systems can lead to better and more precise longer term planning. Such design methodology can be key in military planning too, where large numbers have to be met typically. Hence, this theory can be crucial in resource planning where large numbers have to be met based on complex, typically multilayer and dimension organic/spatial systems in the real world. See also genetic algorithms. Natural self-organization and gravity of time/space order condensation. From the above, we can conclude that systems naturally self-reorganize themselves by the condensation of

order as we propagate forward along the time/space axes towards eternal existence. Hence, the fact of eternal existence in the world has a gravitational power of order that condensates non-lawful relations in the system. From such effects of order and law on systems, we can conclude the following hypothesis about creation.

### Hypothesis of a different existence:

At the very beginning, there was nothing, just empty energy field. But as a concern of existence itself by philosophical matters, would non-existence make sense in the world? No, it makes no sense for a void to exist, therefore, existence remains a vibrant combat of polarities. Middle-Earth got created by the Holy spirit to divide darkness from light. Middle-Earth is a place of worship and as such; the idea of UFO/USO(submerged objects) for example are examples of phantom trickery to sabotage and pirate law. Have the “good side” been born as a differential shadow to evil in the world?

Ref: State of church, 380AD

So Earth, supposedly, have been exploited and supposed to be a gateway between the underground and heaven. A place of purgatory and justice. Hence, Middle-Earth got created by the Holy spirit, plasma as you like and originates by the ancient creation of the world. By physical and real world practices this unfolds by the following practices and theories.

**A few hypothetical and physical indicators about the world and its polarities:**

As a principal, things only exist in the world if they make sense. If something serves no purpose, by pure fundamentalism, it is simply too costly to maintain its existence. See also solitary waves on stability, continuity and the concept of existence in the world. By means of artificial intelligence(AI), we mean that you calculate

all variations of a base knowledge-set and negate that unfolded variation set. By this, we achieved all possible scenarios of a base knowledge-set. Hence the name, artificial intelligence. (Ref: Artificial intelligence V2.5 <http://www.fugeonline.com/>) As matter as such, by physical means, you have plasma (gas energy) that enables and provides the necessary energy supply for the matter to maintain its stable state. As a hypothesis therefore, we also assume that conscious justice in the world materializes in matter basically.

Fundamentally talking, without a conscious reason why anything should exist? So existence depends on solitary waves, self-reinforced energy states. In other words, projecting this idea to the mental world, for existence, you must have a conscious reason, that materializes in goods for example. (Ref: Demon DSP chip v3.2 <http://esdv.fugeonline.com/>)

What seems to be the case is that the ether/plasma is “throwing out“ potential elements and so called candidates for a better democracy and system. But on “system state level”, the world has a problem of being able to shift from chicken/egg syndrome to production state system wide. Meaning, that if you look at the relationship of God and society in historical scales, then it is observable that the process looks more like a gladiator tournament of a corrupted computer, rather than a driven and managed leadership. Is there something we don't understand? Yes there is. Here is the hypothesis: The world was created and by ever since been supplied by the ancient explosion of ether/plasma in the world. Since creation, this plasma/ether interaction have been serving as a catalytic chlorophyl that supercharges the system. But you see, as a sports car or a bomb by itself, without leadership and management, no progress will rise from this scenario state.

So democracy on system level can only rise further if you co-manage and lead this “setup of God.” Only than, we can talk about true leadership, one that governs in respect of theology and culture for example.

With such things in mind, the concern arises that how can we achieve productive work in respect of the world from a systems perspective? Will we make profit if we invent something?

Or is it the numbers? Can we grow the numbers? If you can, some probably made a productive act by realistic measures.

Now, we have come to the conclusion that the solid and stable supply of energy is fundamental to stable existence and such, for the formation of matter for example. Because of this, the state of the matter can differ as far as negative (Hell etc) and positive (Democracy). We split the world into the following parts as far as law is: underground terror and democracy. By this, meaning that hell falls to the idea of underground terror and both the purgatory and heaven fall to democracy since we are talking about a system with leadership.

Now, as such, we come to the conclusion that matter too can have polarities on the time axis and with this, further establishing the fact that the concept of anti-matter and perhaps anti-life is further materialized.

Dante's Divine Comedy by the University of Texas at Austin by Dr. Guy Raffa

<http://danteworlds.laits.utexas.edu/>

Because when the complexity of the systems changes, you have:

- New components
- System wise re-shuffling of elements
- Turnaround bottlenecks

All of these concerns can lead to conflicts during these times but as such, the writer would like to discriminate among 3 possibilities as Dante's inferno says too:

- Falling to hell, meaning underworld terror
- Purgatory, straight opposition and leadership to terror of the underworld
- Heaven where better life conditions exist but with the risk of attacks

## Mapping cyberspace! The dipole quantum gravitation DSP

Books were one of the first objects that our civilization have fabricated to advance our civilization. After the books, the Internet and now dipole quantum gravitation digital signal processors; aka mapping of cyberspace propels value! We have tried to map cyberspace before. We tried it with:

- Internet mud (Information cyberspaces)
- Business intelligence (BI)
- Bilateral/Multilateral/Unilateral resolutions (Diplomacy)
- Navigation technologies. Points of interests (POI) (Spatial/Metric)
- Scalar  $\longleftrightarrow$  Vectorial degree conversions (Decimal/Radial)
- Thermo imaging
- Radioactive (Isotopic) and magnetic cyber-maps
- Gravitational fields
- Any kind of cyber-map (RFID technology etc) that can help decision making indeed

Why would we need a dipole quantum gravitation digital signal processors then? Are the cyber-maps we have are not good enough? Well, what do we want to achieve? We are talking about a 3D field in which not just information occurs bur forces and material structures too. These forces and material structures have impact as well as physical effect. Now, what we are interested in is physics and this is what differentiates this DSP processor from any other cyber-technology that we have used before. As soon as we have vectors, we talk about force and hazard. This also means that 3D physical space have:

- Physical radiation that can damage organic or synthetic material
- Physical force (Lorentz, magnetic force etc) that can also damage or can be hazardous
- Any other physical or other force which can be described by power, rather than information.

**(A) Electromagnetic field mechanics (EMFM): Lagrange equations**

Field equations

Consider a class of scalar-tensor theories with the Lagrangian density

$$L = A(\varphi)R + B(\varphi)g^{\alpha\beta}\varphi_{,\alpha}\varphi_{,\beta} - 2\Lambda(\varphi) + 2\kappa_0 L_m(\Psi(\varphi)g^{\alpha\beta}, \dots), \quad (2)$$

where  $\varphi$  is the scalar field which we assume to be real (see Appendix 1);  $L_m$  is the matter Lagrangian;  $\kappa_0 = 8\pi c^{-4}G_0$  is an initial gravitational constant, generally speaking, a non-Einsteinian one;  $A, B, \Lambda$  and  $\Psi$  are arbitrary functions;  $R = g^{\alpha\beta}R_{\alpha\beta}$  is the scalar curvature and  $R_{\mu\nu} = R^{\alpha}_{\mu\alpha\nu}$  the Ricci tensor. The Riemann tensor  $R^{\mu}_{\nu\alpha\sigma}$  is defined by the formula

$$(\nabla_{\mu}\nabla_{\nu} - \nabla_{\nu}\nabla_{\mu})A_{\sigma} = R^{\alpha}_{\sigma\mu\nu}A_{\alpha}$$

with an arbitrary vector  $A_{\mu}$ . The metric tensor  $g_{\mu\nu}$  has the signature  $(+ - - -)$ . Greek indices range from 0 to 3, Latin ones from 1 to 3;  $\varphi_{,\alpha} \equiv \partial\varphi/\partial x^{\alpha}$ .

**(B) Weight and energy relation (transforming formula of energy and weight):  $E=mc^2$**

So, the Einsteinian formula of energy and weight relation describes a relation, while the Lagrangian formula describes the method of work measurable in Joule. This also means that tensor formulas of containers are “connected” with the Einsteinian formula by the Lagrangian formulas. This means that real work of the coefficient of performance or COP (also called CP or CoP) steps in by the equations of tensor formulas of Dr. Kirill A. Bronnikov and the Lagrangian formulas.

$$E = mc^2 \quad CoP = \frac{\text{Energy input (Kw)}}{\text{Energy output (Kw)}}$$

*CoP 1.0 > → Effective work performance in respect of overall system*

Hence, we can conclude that real work in respect of the overall system can only be referred to as accountable as far as we can introduce a CoP 1.0 coefficient in the Einsteinian-Lagrangian formula’s equation. In other words true artificial intelligence (salvation) is established by physical real world standards kinetic system wise talking. (Ref: Matrix movie) In other words superior equilibrium of existential state in the democratic world. By this, we also refer to the state of the past or present world as a fake or distorted reality of democracy. In which some or perhaps, many laws do not stand as justified equilibrium of existential state is concerned in respect of the overall system or world. By this, the author refers to “such situation” as a trap or black hole of space and time, from which one should get out by law and order obviously.

(C) Tensor equations (Containers):

Tensor equations

As the tensor  $T_{\mu\nu}$  is yielded by the variation

$$T_{\mu\nu} = \frac{2}{\sqrt{-g}} \frac{\delta}{\delta g^{\mu\nu}} \int L_m \sqrt{-g} d^4x, \quad d^4x \equiv dx^0 dx^1 dx^2 dx^3, \quad (9)$$

in theory (2) the equations of motion have the form (1) only if  $\Psi \equiv \text{const.}$  A conformal transformation of the type (4) allows us, however, to achieve this for any theory (2) [5]. Besides, here we are dealing with distances small on cosmological scale and so it is reasonable to put  $\Lambda \equiv 0$ . Thus we consider theory (2) under assumptions

$$\Lambda(\varphi) \equiv 0; \quad \Psi(\varphi) \equiv 1. \quad (10)$$

What we can understand is that neither the Lagrangian equations of electromagnetic field mechanics, nor the Einstein formula of energy and gravitation bring concerns of energy storage or loss due to “premature” or “intermediate transitional” states. By premature or intermediate transitional, the author means non-determining in respect of actual energy storage or definite loss. Since both the Lagrangian and the Einsteinian formulas describe a non-established or storable energy state. As such, the determination of derivation, storage or loss of energy tensors are indefinite.

Hence, what we are talking about is NOT a cyberspace of information mapping but a physical or any other force that can cause damage or any hazard to our society. See also plasma weapons, Lorentz and magnetic fields etc.

Ref: Tesla coil

So, is cryptocurrency a universal justice, particular to a market? An encoded tensor of market segment? People used to say brick and mortar businesses. Do they say now encoded crypto markets that are locked in the now well known cyber-world by their market particulars? Can we use crypto markets to decipher unknown markets similar to justice analogy? As such you see, work and time become high concern due to higher stakes of more

precisely and deeply valued markets. Now, if we can not attempt the problems/situation in this setup, then you really have to bring in classification. So called casts of work load handling. Are we realistic and practical enough by real world standards?

A theoretical question could be this. If humans (people) can not sense their physical damage on their body. For example, someone bleeds or have got a virus but still doesn't sense or knows about it consciously. Then we have the question

whether people are conscious enough not just about the environment but about themselves too in serious manners. We can conclude that people are definitely not conscious about themselves, perhaps, about their thinking and goals maybe.

	Have state of self consciousness	Work matters	Time matters	Energy/resources matter
<b>Animals:</b>	No	Yes	Yes	Yes
<b>Humans and humanoids (and mutants):</b>	Yes	Yes	Yes	Yes
<b>Robots/drones and automated systems:</b>	Yes	No	No	No (nuclear resources, free energy devices)
<b>Computers (cybernetics):</b>	Yes	No	No	No (nuclear resources, free energy devices)

By this concern, we have arrived to the rivalry of robots and industrial automation in general; in which system states are stored in memory in a continuous way (redundantly protected) and robots can sense about almost anything we want by modern day sensors. Now, by this practically challenging property; we realize, that robots or industrial automation can exchange people in vast functions and roles. As such “industrial revolution” have happened before the I-II World War too. That probably created the “idea of WolfEinsteinian security” defense. Meaning, nuclear biophysics and artificial intelligence(AI) compatible/legitimate. The “deal” is the intellectual value of person vs. a robot or industrial

automation solution. And its introduction to the monetary (healthcare) market and cryptocurrency markets (commodities). With such universal terms in mind, we can see that that there is a clear and practical difference of people and robots/industrial automation on the market and in the economy. This, hence raises the social impact of pay, class differences and security. With the introduction of the monetary (healthcare) market and cryptocurrency markets (commodities); we have arrived to artificial intelligence (AI) compatible justice and law.

By this, the author refers to both healthcare as a monetary unit and cryptocurrency markets as commodities too. This also raises the question whether healthcare and the idea of crypto(nuclear economy) was justified prior to the I-II World War. See also the Spanish flu (Metabolism) pandemic

in 1918-1919 which killed up to 100 million people alone! Such historic facts are indicators, that neither human healthcare nor the concept of a nuclear based economy have been solved on global levels. See also Cold-war, oil and energy conflicts. The study of energetics, cryo/RFID/plasma and economic propulsion systems of space programs.

AI platform	Particulars	How they created?	Usage
<b>Dysfunctional</b>	Beast or animal etc.	By mother nature.	Domestic or wild etc.
<b>Plasma(Holy spirit) created natural creatures.</b>	In physical harmony with nature. Symmetries. "Look good do good."	By mother nature.	Domestic etc.
<b>Engineered AI compatible products or (creatures?)</b>	No symmetry or harmony necessarily but <u>functional and engineering operation</u> .	Engineering and computing.	Production oriented etc.
<b>Plasma/AI created products and (creatures?)</b>	A "shooter in time and space." Like the idea of AI enabled robots/transformers.	Engineering, computing and plasma physics.	Get a job done etc.

A new generation of products and mutant creatures? Symmetry surely did not work out in a socially and environment dependent manipulated driven world. Leadership requires asymmetry and dynamics rather than bondage to space, time and environment. We can differentiate by passive and active artificial intelligence (AI) enabled products and creatures. Based on engineering, computing and plasma physics.

By putting the above together, does nature or God left us a message that we should read out for taking our eternal human fate in hand? Well, a lot of people got mesmerized by the Orion constellation of the Egyptian pyramids the same way by the mythology of ancient civilizations. Practically and astronomy radio physics talking, the Orion constellation simply determines a space/time axis as a possible gateway, cosmic path to outer space. Here is the hypothesis. The Orion constellation is determined by three main stars above the pyramids. This cosmic constellation determines a walking human figure in the cosmos.

Geological measurements state that the gravitational center of planet earth lies in Cairo, Egypt. Which was the center of the ancient civilization. Theoretically, as more and more modern satellite measurements are made. It is proven that all physical geometries were maximized to enforce equilibrium states of cosmic stability.

The Orion star constellation that occurs approximately every 5000 years according to astronomers.

What can be interesting is that there are volcanoes on Mars too that also form a triangle constellation similar to the Orion star constellation in Cairo, Egypt. Now, what is also interesting the following:

(1) There are also nature made pyramids on the Antarctic on the North-Pole of planet Earth. See enclosed photo of black pyramids on the North-pole of similar size to the pyramids in Cairo, Egypt.

(2) There is also a human built looking pyramid on Mars but smaller than in Egypt.

(3) Middle-Earth as they say it is a judgment place out of cosmic anarchy? Was this Mars-Earth constellation the base of the once famous ancient Martian-Roman empire of the Romans and the Martians?

The Orion star constellation. The pyramids on the Antarctic and their possible radio-bio-pace relation with the Moon tidal-wave period. A cosmic physical-spatial system in superposition.

The Moon tidal-wave period and its ocean current alternations. Radio, the ether, water and gravity. System of force?

A relative map of the Orion star constellation to the galaxy. This gap in the alignment could cause the 5000 year cyclic period of the Orion star constellation. Since the Orion star alignment is on an ecliptic orbit compared to the center of the galaxy.

Is this the edge of the Roman-Martian (Babylon) ancient civilization by God's will? Do we understand our history? Or are thousands of Hollywoodian blockbusters just made of stories of lunatics? But aren't people believe and seek the path of justice too? What moral and ethical questions should we ask ourselves?

Ref: Mars and its canyon with the volcanos

Ref: Jupiter and its Moon IO and Europa

Ref: The Orion star constellation

Ref: The 9 circles of Hell, Purgatory and Paradise. And the passageway of the city of the dead.

A hypothetical question would be if the once famous Roman-Martian (Babylon) empire could be the key to the cosmic presence of human civilization in space?

Is the face on Mars the final human message we got from space or are there other historic and cosmic messages of our existence? Could it be true that once famous Roman-Martian-Babylonian empire have failed at the height of not being able to contact Atlantis planet? Have the Roman-Martian-Babylonian empire not been able to reach extraterrestrial governments due to its civilizational underdevelopment? Does the key lie in the Orion star constellation as a path to the cosmos? Could be good questions one might ask.

If we don't think in universal terms after reaching a level of consciousness, what hopes we have in a complex and advanced world beyond order and trust of democracy? It is well known that the world is representing its state by mental projection in the real world. In other words, the world's consciousness is materialized in matter and the state of world indeed. Thinking of it from a backward point of view. What other state could the world have than what it is conscious of indeed? Please also see my pocketFIT, FIT book and this document on the relationship between matter and consciousness and universal term thinking. Ref: (<http://esdv.fugeeonline.com/>) Thank you!

VII. TABLE OF FORMULA SYMBOLS

<u>Electric field</u>			<u>Magnetic field</u>		
<b>E</b>	V/m	Electric field strength	<b>H</b>	A/m	Magnetic field strength
<b>D</b>	As/m <sup>2</sup>	Electric displacement	<b>B</b>	Vs/m <sup>2</sup>	flux density
<b>U</b>	V	Tension voltage	<b>I</b>	A	Current
<b>b</b>	V/m <sup>2</sup>	potential density	<b>j</b>	A/m <sup>2</sup>	Current density
<b>ε</b>	As/Vm	Dielectricity	<b>μ</b>	Vs/Am	Permeability
<b>Q</b>	As	Charge	<b>φ</b>	Vs	Magnetic flux
<b>e</b>	As	Elementary charge	<b>m</b>	kg	Mass
<b>τ<sub>2</sub></b>	s	Relaxation time constant of the potential vortices	<b>τ<sub>1</sub></b>	s	Relaxation time constant of the eddy currents

other symbols and Definitions:

Specific electric conductivity	<b>σ</b>	Vm/A
Electric space charge density	<b>ρ<sub>el</sub></b>	As/m <sup>3</sup>
Dielectricity	<b>ε</b> =	<b>ε<sub>r</sub> · ε<sub>0</sub></b> As/Vm
Permeability	<b>μ</b> =	<b>μ<sub>r</sub> · μ<sub>0</sub></b> Vs/Am
Speed of light	<b>c</b> =	$1/\sqrt{\epsilon \cdot \mu}$ m/s
Speed of light in a vacuum	<b>c<sub>0</sub></b> =	$1/\sqrt{\epsilon_0 \cdot \mu_0}$ m/s
Time constant of eddy currents	<b>τ<sub>1</sub></b> =	<b>ε/σ</b> s
