

The Lord's handbook for engineering our faith (Gamma(γ) 8.4 version 3rd rev)

Re-definition of artificial intelligence(AI):

Practically talking, AI is maximizing knowledge out of a given set of knowledge. By AI we do not just mean negation of information values but the formal process of maximizing it. Hence the word; completeness. Once we achieved a complete set of knowledge of a given set of knowledge set, then we can say that we have the complete knowledge set that can relate back to the base knowledge set. AI acts as a differential engine similar to differential

gears in vehicles. Circle(canto) of Hell and ministry of the ether are not comparable to each other. But if you use AI and emulate the knowledge state, then you have life and death scenario of self manifestation in real world. Can a cyborg be born? Thus, AI can be used to camouflage self existence.

Hypothesis of theory of evolution:

There is a suspicion that eternal evolution happens in a self driven way. Meaning that resources, dependencies and structure of the 3D ether, space for life is "rendered out" based on dependency to eternal evolution forward in time. In practical physical terms, this means that constructive interferometry is applied in the Coulomb charge field in which energy chunks interfere with one another. Thus, creating or destructing processes of forward eternal evolution. Similar to genetic algorithms determined by the "chromosomes/genetic algorithms" of the given system that

Ref: Monogram of Christ

describe its characteristics. By eternal forward evolution, we mean that resources, dependencies and structure of the 3D ether are rendered out based on constructive interferometry in respect of the complete system. This raises the concern of the presence of both life and anti-life. This theory therefore assumes that catalyst and non-catalyst particles (God and hell particles etc.) are created and destroyed along the time axes of this eternal evolution. See also charm quarks (\rightarrow kinetic composite functions. Unity and the science of kymatica) or photon and anti-photons. Similar to occurring and disappearing species in ecology for example. So what we talk about basically is a purely dependency driven system; in which only the forward time axis of eternal evolution matters. One note that author may make. By system theory, no matter which law you start following, you will end up with the same system of complete existence based on

constructive interferometry. This means that presence of law in the world itself defines a world which is based on law. Hence, without law, the world can not exist and can not be described.

At the same time, any error in existence creates a constructive interferometry ripple effect which automatically folds forward again. Hence, the presence of

law in the worlds itself defines completeness of existence. “In the Lord we trust.” It is also assumed that anti-life is a non-constructive form of existence in respect to the complete system. Such forms of existence typically include pesticides, parasites and viruses etc. The importance of the theory of evolution is that we can now plan several factorial simple on longer range projections of complex systems. Theory of evolution therefore also depends on system theory. Meaning that simpler principle and better understanding of

spatial/organic systems can lead to better and more precise longer term planning. Such design methodology can be key in military planning too, where large numbers have to be met typically. Hence, this theory can be crucial in resource planning where large numbers have to be met based on complex, typically multi-layer and dimension organic/spatial systems in the real world. See also genetic algorithms. Natural self-organization and gravity of time/space order condensation. From the above, we can conclude that systems naturally self-reorganize themselves by the condensation of order as we propagate forward along the time/space axes towards eternal existence. Hence, the fact of eternal existence in the world has a gravitational power of order that

condensates non-lawful relations in the system. From such effects of order and law on systems, we can conclude the following hypothesis about creation.

Hypothesis of a different existence:

At the very beginning, there was nothing, just empty energy field. But as a concern of existence itself by philosophical matters, would non-existence make sense in the world? No, it makes no sense for a void to exist, therefore, existence remains a vibrant combat of polarities. Middle-Earth got created by the Holy spirit to divide darkness from light. Middle-Earth is a place of worship and as such; the idea of UFO/USO(submerged objects) for example are examples of phantom trickery to sabotage and pirate law. Have the “good side” been born as a differential shadow to evil in the world? So Earth, supposedly, have been exploited and

Ref: State of church, 380AD

supposed to be a gateway between the underground and heaven. A place of purgatory and justice. Hence, Middle-Earth got created by the Holy spirit, plasma as you like and originates by the ancient creation of the world. By physical and real world practices this unfolds by the following practices and theories.

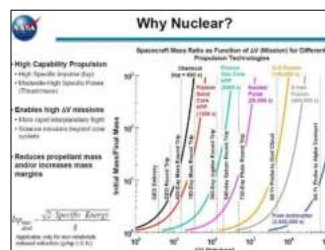

A few hypothetical and physical indicators about the world and its polarities:

As a principal, things only exist in the world if they make sense. If something serves no purpose, by pure fundamentalism, it is simply too costly to maintain its existence. See also solitary waves on stability, continuity and the concept of existence in the world. By means of artificial intelligence(AI), we mean that you calculate

all variations of a base knowledge-set and negate that unfolded variation set. By this, we achieved all possible scenarios of a base knowledge-set. Hence the name, artificial intelligence. (Ref: Artificial intelligence V2.5 <https://zoltanpdesign.wordpress.com/>) As matter as such, by physical means, you have plasma (gas energy) that enables and provides the necessary energy supply for the matter to maintain its stable state. As a hypothesis therefore, we also assume that conscious justice in the world materializes in matter basically.

Fundamentally talking, without a conscious reason why anything should exist? So existence depends on solitary(circles) waves, self-reinforced energy states. In other words, projecting this idea to the mental world, for existence, you must have a conscious reason, that materializes in goods for example. (Ref: Charm DSP chip v3.2 <https://www.linkedin.com/in/zoltanp/>)

What seems to be the case is that the ether/plasma is “throwing out“ potential elements and so called candidates for a better democracy and system. But on “system state level”, the world has a problem of being able to shift from chicken/egg syndrome to production state system wide. Meaning, that if you look at the relationship of God and society in historical scales, then it is observable that the process looks more like a gladiator tournament of a corrupted computer, rather than a driven and managed leadership. Is there something we don’t understand? Yes there is. Here is the hypothesis: The world was created and by ever since been supplied by the ancient explosion of ether/plasma in the world. Since creation, this plasma/ether interaction have been serving as a catalyst chlorophyll that

supercharges the system. But you see, as a sports car or a bomb by itself, without leadership and management, no progress will rise from this scenario state.

So democracy on system level can only rise further if you co-manage and lead this “setup of God.” Only than, we can talk about true leadership, one that governs in respect of theology and culture for example.

With such things in mind, the concern arises that how can we achieve productive work in respect of the world from a systems perspective? Will we make profit if we invent something? Or is it the numbers? Can we grow the numbers? If you can, some probably made a productive act by realistic measures.

Now, we have come to the conclusion that the solid and stable supply of energy is fundamental to stable existence and such, for the formation of matter for example. Because of this, the state of the matter can differ as far as negative (Hell etc) and positive (Democracy). We split the world into the following parts as far as law is: underground terror and democracy. By this, meaning that hell falls to the idea of underground terror and both the purgatory and heaven fall to democracy since we are talking about a system with leadership. See also the city of the dead, Circle 6 (Ref: Cairo, Egypt) in the 9 circles of Hell as a passageway of purgatory to a wider scene of democracy. Now, as such, we come to the conclusion that matter too can have polarities on the time axis and with this, further establishing the fact that the concept of anti-matter and perhaps anti-life is further materialized.

Iron(Fe^{26}) in blood evolved to metal chitin? **Biophysical fusion** research. Ancient ‘hell ant’ with metal horns & trap jaw found inside amber (PHOTOS)

Ref: <https://www.rt.com/news/402982-prehistoric-ant-horn-amber/>

One interesting quality in physical artificial intelligence. Emphasizing salvation, in the practical real world; the ether is radioactively polarized along all possible axis of time, space and even string theory. This means that all units in the radioactively polarized Coulomb charge field have their own nuclear properties. This is hardly discussed in conventional physics or nuclear sciences yet.

However, in respect to kWh and Joule(work); nuclear impact is significant. As such, the El-Nino climate anomaly, Spanish flu and human metabolic systems all share the properties of radioactive charge and the significance of ionospheric studies.

kWh work(J) in a nuclear torsional string theory real life scenario, such forces could be considered significant and desirable to be identified. Climate wise meaning, there is scientific evidence that certain plants have a period of four years biological cycle. Due to four; being a factorial in a 3D XYZ reference system in which you have a center(isotopic determinant of origo) too of 3D isotopically(polar) space. This could also explain why we have four seasons or why even presidents got stuck with this shift index of radioactive matters of number four presidential periods.

Should we worry of an unidentified physical constant? Or biophysical cycle and stolen/hidden nuclear field we have not yet identified yet? Is it terror of Hell itself?

Biology has proved itself. Rowan berry (on the picture on the left side) is a fruit of the rose family in general and produce fruits only every four years. Does this mean that the rowan berry family of fruits are in a nuclear asleep state for 4 years and then as El-Nino climate anomaly, make a turn and produce their fruits at “discharge” of accumulated charge period? Bears sleep during the winter. Season and earth cycles in four season periods too. Do we have an ionospheric hidden energy field (Hell/Heaven etc) that we have not identified yet? An isotopic biological cycle that got stolen from us? Mushrooms are viable too in this respect; because they can produce energy rich food without the photosynthesis of sunshine. Sunshine is singular to oil or fat etc.

This also means that mushrooms do not depend on sunshine. They do not require chlorophyll cells for photosynthesis that usually produces sugar in fruits.

The problem with sugar is that it "burns" cells in large quantities while mushrooms produce more protein friendly oil/fat similar to fish for example.

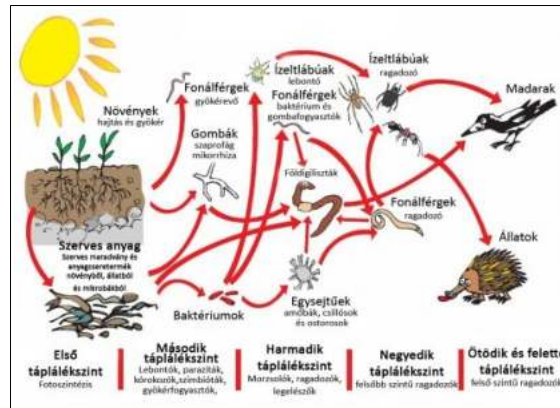

The Planck Constant: h

$h = 6.626 \times 10^{-34} \text{ J s}$

a proportionality between frequency (ν) and energy

$E = h\nu$

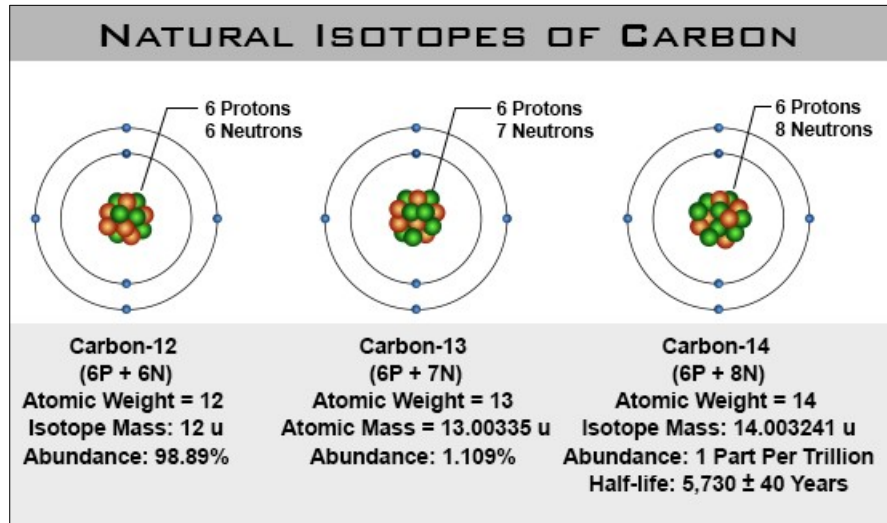

Academic references of the 3 laws of thermodynamics:

The three laws of thermodynamics define physical quantities (temperature, energy, and entropy) that characterize thermodynamic systems at thermal equilibrium. The laws describe how these quantities behave under various circumstances, and preclude the possibility of certain phenomena (such as perpetual motion).

The three laws of thermodynamics are:

First law of thermodynamics:

When energy passes, as work, as heat, or with matter, into or out of a system, the system's internal energy changes in accord with the law of conservation of energy. Equivalently, perpetual motion machines of the first kind (machines that produce work with no energy input) are impossible.

$$\Delta U = Q - V$$

Second law of thermodynamics: In a natural thermodynamic process, the sum of the entropies of the interacting thermodynamic systems increases. Equivalently, perpetual motion machines of the second kind (machines that spontaneously convert thermal energy into mechanical work) are impossible.

$$dS = \frac{\delta Q}{T}$$

Third law of thermodynamics: The entropy of a system approaches a constant value as the temperature approaches absolute zero.[2] With the exception of non-crystalline solids (glasses) the entropy of a system at absolute zero is typically close to zero.

$$\Delta S = S - S_0 = k_B \ln(\Omega) \text{ where } k_B \text{ is the Boltzmann's constant}$$

$$k_B = 1.38 \times 10^{-23} \text{ J K}^{-1}$$

Light(photosynthesis), sugar(burn) and oil are three different sources of energy. But oil is clearly a gap in fundamental ways because of its molecular(atomic) complexity. Compared to light(photon) and sugar(mostly in crystal structure) because the molecular structure of oil is simply more sophisticated in an isotopic(nuclear) 3D field. All three energy sources are using O² as a burning compound for their energy fusion process. Oxygen(O²) is an expensive compound for energy fusion but nuclear fusion compounds such as Uranium or Plutonium do not require Oxygen and have several magnitude of energy fusion processes.

Does this mean the humans and most fruits, vegetables are in a not yet advanced life for in their energy processes for example?

The Avogadro constant: usually denoted by N_A [6] or L [8] is the factor that, multiplied by the amount of substance in a sample, measured in moles, gives the number of constituent particles in that sample. Its numerical value is defined as being the Avogadro number, and its unit is the reciprocal of mole; that is,

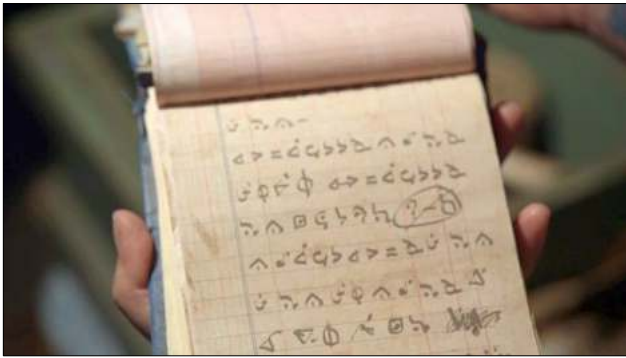

$$N_A = 6.02214076 \times 10^{23} \text{ mol}^{-1}$$

The process of creation:

(1.) Dark ages and the creator. Ancient explosion created the dark world in which ancient creatures have been living including the creator itself. Similar life conditions to the bottom of oceans. The evolution process gradually slowed and cooled down as more complex and sophisticated forms of life took place in the name of justified and equilibrium state world.

Ref: Tripods from Ist World War. The Martian code map.
(*Martian museum archive, UK)

(2.) Creation with the power of thought. The creator created Middle Earth over millions of years as in the Biblical creation or with Pandora's box for example. Creation happened with the power of thought.

(3.) Continuity and another creation. Have to continue this creative process of justice using nuclear, anti-life and anti-matter beyond infrared (Doppler-effect) technologies etc. As such, the evolution of the world can be broken up into the following periods/forms to our best. Did tripods(bugs) use zero-point energy(Eddy current) to supply their metallic framework with electricity?

Milestones:

(1.) [Light] Darkness/Light → Bible and Qur'an
→ Revolution: Books and Internet

(2.) [Energy] Energy/Infrared → Red-shift/Isotopic, Spitzer space telescope. Cold-war
→ Revolution: DSP technology, Metaphysics

(3.) [Law] Hell/Democracy → I-IInd World War. Asimov
→ Revolution: Further technologies that can break down dimensions of systems. Infrared (Doppler-effect). Nuclear. Anti-life technologies etc.

Therefore, the first form of the universe was darkness. This means that the universe did exist before the Biblical creation even with creatures in it. The second period of the universe's evolution was the creation of light and the division of light from darkness as the Bible and Qur'an says too.

During these evolutionary period shifts, we have turbulent turnovers as far as tensor and system theory is concerned. Ref: (Inferno, Purgatory and Paradise) presented in Dante's Divine Comedy by the University of Texas at Austin by Dr. Guy Raffa <http://danteworlds.laits.utexas.edu/>

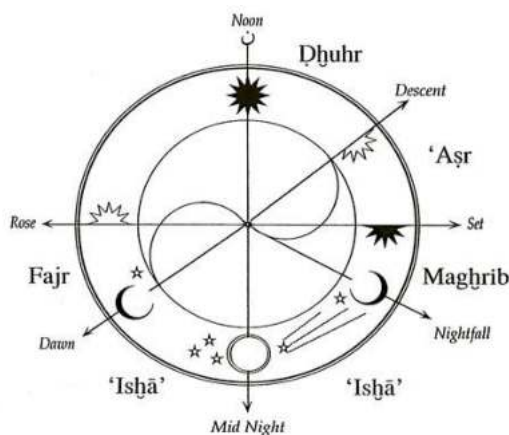

Because when the complexity of the systems changes, you have:

- New components
- System wise re-shuffling of elements
- Turnaround bottlenecks

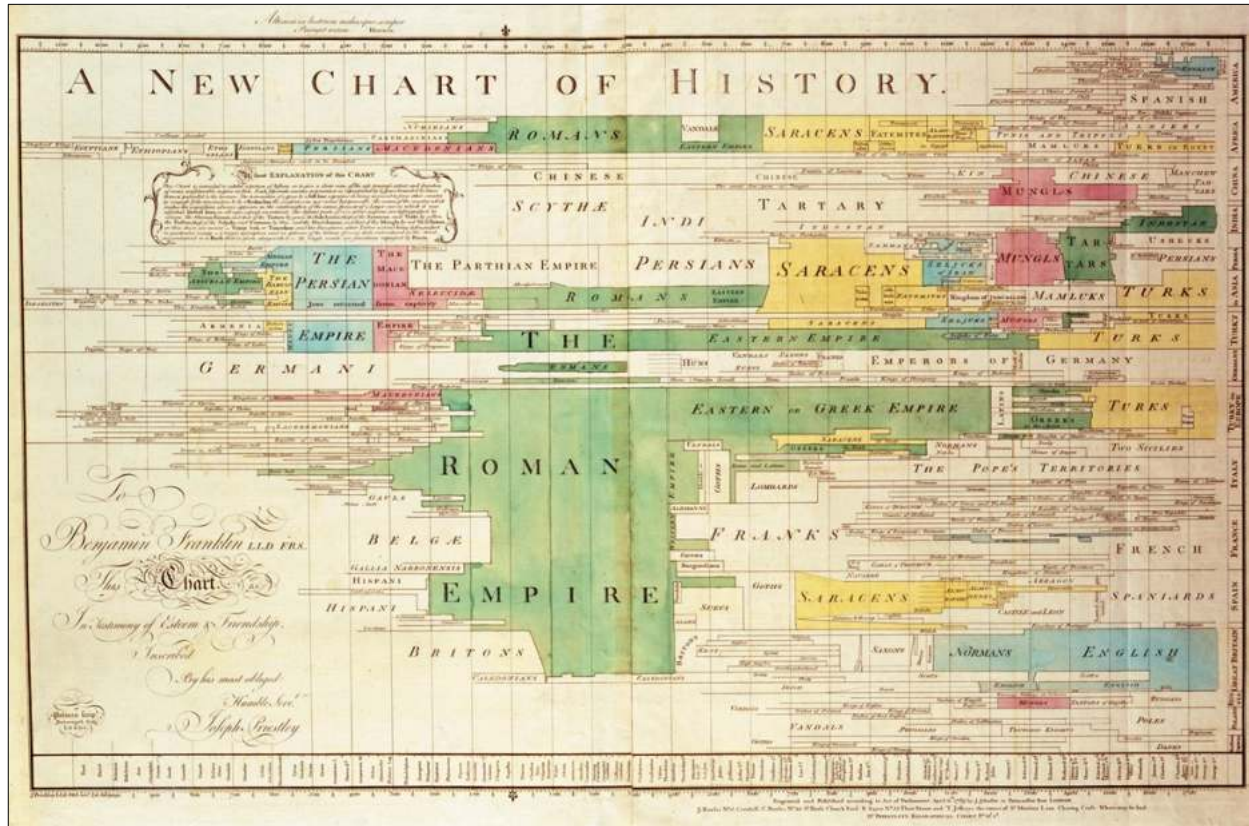

Religion/fundamental	Particulars*
Hell/Demonic:	Laws of hell and demonic figures. Opposite in every possible way compared to any other religion. <u>Non-comparable(alien)</u> to “God like” religions or fundamentals. New genetic species at God’s will?
Tao/Zen:	Study of the mechanics of the soul. Plasma physics mechanics (Lagrangian polynomials)
Krishna:	Welcoming the Lord
Islam:	Prayer of Allah (plasma)
Protestant:	The turning point
Evangelic:	The fundamental of order
Calvinistic/reformed:	Revolutionary/reformed/liberated
Catholic:	Complete system of religions in “canonical” form. (Baptized) Pope as human representative of messenger. (Prophets)
Buddhisms:	Similar to Catholics principles but instead of a human representative, Buddhisms represents spiritual being as a leader. Buddha.

Hence, Catholics and Buddhism are close to each other since one of them represents a human, the Pope as a representative of the Holy spirit. While Buddhism is based on the representation of a spiritual leader, Buddha. All of these concerns can lead to conflicts during turn around times but as such, the writer would like to discriminate among 3 possibilities as Dante’s inferno says too:

- Falling to hell, meaning underworld terror
- Purgatory, straight opposition and leadership to terror of the underworld
- Heaven where better life conditions exist but with the risk of attacks

Ref: Praying. Shurooq, the 2nd prayer in a day is Sunrise. Hence, energetics in cybernetics is an important factor too if look at theology as a science of cybernetics. Also called ministries of heaven, the holy spirit. See also the Matrix movie and plasma physics. There are six prayers in Islam in a day etc.

[Mapping cyberspace! The dipole quantum gravitation DSP](#)

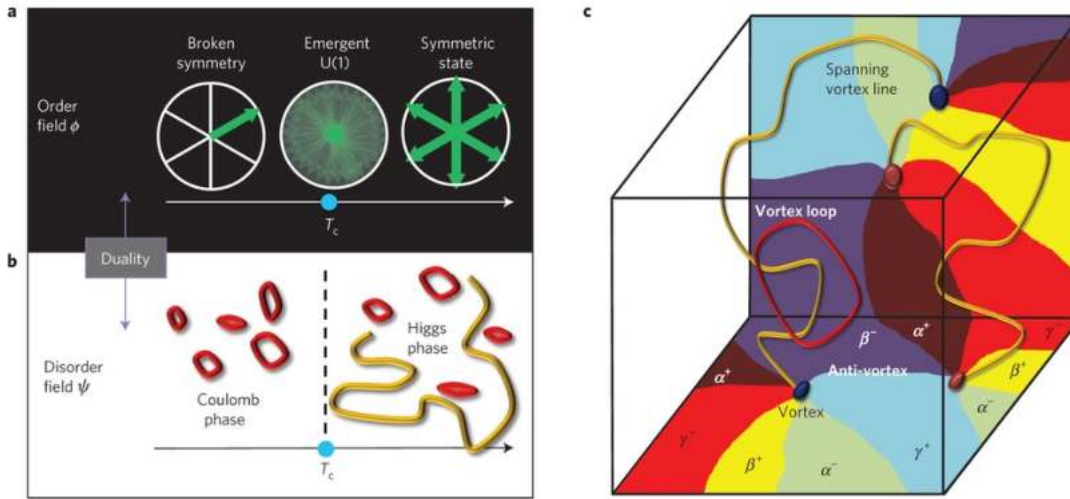

Books were one of the first objects that our civilization have fabricated to advance our civilization. After the books, the Internet and now dipole quantum gravitation digital signal processors; aka mapping of cyberspace propels value! We have tried to map cyberspace before. We tried it with:

- Internet mud (Information cyberspaces)
- Business intelligence (BI)
- Bilateral/Multilateral/Unilateral resolutions (Diplomacy)
- Navigation technologies. Points of interests (POI) (Spatial/Metric)
- Scalar \longleftrightarrow Vectorized degree conversions (Decimal/Radial)
- Thermo imaging
- Radioactive (Isotopic) and magnetic cyber-maps
- Gravitational fields
- Any kind of cyber-map (RFID technology etc) that can help decision making indeed

Why would we need a dipole quantum gravitation digital signal processors then? Are the cyber-maps we have are not good enough? Well, what do we want to achieve? We are talking about a 3D field in which not just information occurs bur forces and material structures too. These forces and material structures have impact as well as physical effect. Now, what we are interested in is physics and this is what differentiates this DSP processor from any other cyber-technology that we have used before. As soon as we have vectors, we talk about force and hazard. This also means that 3D physical space have:

- Physical radiation that can damage organic or synthetic material
- Physical force (Lorentz, magnetic force etc) that can also damage or can be hazardous
- Any other physical or other force which can be described by power, rather than information.

(A) Electromagnetic field mechanics (EMFM): Lagrange equations

Field equations

Consider a class of scalar-tensor theories with the Lagrangian density

$$L = A(\varphi)R + B(\varphi)g^{\alpha\beta}\varphi_{,\alpha}\varphi_{,\beta} - 2\Lambda(\varphi) + 2\kappa_0 L_m(\Psi(\varphi)g^{\alpha\beta}, \dots), \quad (2)$$

where φ is the scalar field which we assume to be real (see Appendix 1); L_m is the matter Lagrangian; $\kappa_0 = 8\pi c^{-4}G_0$ is an initial gravitational constant, generally speaking, a non-Einsteinian one; A, B, Λ and Ψ are arbitrary functions; $R = g^{\alpha\beta}R_{\alpha\beta}$ is the scalar curvature and $R_{\mu\nu} = R^{\alpha}_{\mu\alpha\nu}$ the Ricci tensor. The Riemann tensor $R^{\mu}_{\nu\sigma\alpha}$ is defined by the formula

$$(\nabla_{\mu}\nabla_{\nu} - \nabla_{\nu}\nabla_{\mu})A_{\sigma} = R^{\alpha}_{\sigma\mu\nu}A_{\alpha}$$

with an arbitrary vector A_{μ} . The metric tensor $g_{\mu\nu}$ has the signature $(+ - - -)$. Greek indices range from 0 to 3, Latin ones from 1 to 3; $\varphi_{,\alpha} \equiv \partial\varphi/\partial x^{\alpha}$.

(B) Weight and energy relation (transforming formula of energy and weight): $E=mc^2$

So, the Einsteinian formula of energy and weight relation describes a relation, while the Lagrangian formula describes the method of work measurable in Joule. This also means that tensor formulas of containers are “connected” with the Einsteinian formula by the Lagrangian formulas. This means that real work of the coefficient of performance or COP (also called CP or CoP) steps in by the equations of tensor formulas of Dr. Kirill A. Bronnikov and the Lagrangian formulas.

$$E = mc^2 \quad CoP = \frac{\text{Energy input (Kw)}}{\text{Energy output (Kw)}}$$

CoP 1.0 → Effective work performance in respect of overall system

Hence, we can conclude that real work in respect of the overall system can only be referred to as accountable as far as we can introduce a CoP 1.0 coefficient in the Einsteinian-Lagrangian formula's equation. In other words true artificial intelligence (salvation) is established by physical real world standards kinetic system wise talking. (Ref: Matrix movie) In other words superior equilibrium of existential state in the democratic world. By this, we also refer to the state of the past or present world as a fake or distorted reality of democracy. In which some or perhaps, many laws do not stand as justified equilibrium of existential state is concerned in respect of the overall system or world. By this, the author refers to “such situation” as a trap or black hole of space and time, from which one should get out by law and order obviously.

(C) Tensor equations (Containers):

Tensor equations

As the tensor $T_{\mu\nu}$ is yielded by the variation

$$T_{\mu\nu} = \frac{2}{\sqrt{-g}} \frac{\delta}{\delta g^{\mu\nu}} \int L_m \sqrt{-g} d^4x, \quad d^4x \equiv dx^0 dx^1 dx^2 dx^3, \quad (9)$$

in theory (2) the equations of motion have the form (1) only if $\Psi \equiv \text{const.}$ A conformal transformation of the type (4) allows us, however, to achieve this for any theory (2) [5]. Besides, here we are dealing with distances small on cosmological scale and so it is reasonable to put $\Lambda \equiv 0$. Thus we consider theory (2) under assumptions

$$\Lambda(\varphi) \equiv 0; \quad \Psi(\varphi) \equiv 1. \quad (10)$$

What we can understand is that both the Kirillian and Einsteinian formulas describe parametric tensor equations since the formula of relativity is also a formula for tensors. If we use **E**(energy) and **c**(speed of light/photon in vacuum) as the variants of **m**(weight). Then we can realize that **m** will depend on E and **c** variant and constant. This also means that **m** as the weight will determine the level and state of energy/information storage in the vacuum. This level and state (virtuality) of material composition is hence determined by the Lagrangian equations. Where Laplace corresponds to the Mathematical and

Lagrange corresponds to the physics polynomial. See also the Schrödinger equations of Coulomb wave (scalar radio) interferometry in the Coulomb charge field where physical conditions alter both the ideological Laplace and Lagrange models.

Hence, what we are talking about is NOT a cyberspace of information mapping but a physical or any other force that can cause damage or any hazard to our society. See also plasma weapons, Lorentz and magnetic fields etc. This also means that the $E=mc^2$ formula determines both negative and positive time-domain. Partitioned by anti particles and normal particles. For example an anti-photon would mean that the nominal weight of 1kg is negative compared to a normal photon. Hence, this also means that Dr. K. A. Bronnikov formula is also a parametric formula that stands for both negative and positive time domain.

Ref: Tesla coil

So, is cryptocurrency a universal justice, particular to a market? An encoded tensor of market segment? People used to say brick and mortar businesses. Do they say now encoded crypto markets that are locked in the now well known cyber-world by their market particulars? Can we use crypto markets to decipher unknown markets similar to justice analogy? As such you see, work and time become high concern due to higher stakes of more precisely and deeply valued markets.

Now, if we can not attempt the problems/situation in this setup, then you really have to bring in classification. So called casts of work load handling. Are we realistic and practical enough by real world standards?

A theoretical question could be this. If humans (people) can not sense their physical damage on their body. For example, someone bleeds or have got a virus but still doesn't sense or knows about it consciously. Then we have the question whether people are conscious enough not just about the environment but about themselves too in serious manners. We can conclude that people are definitely not conscious about themselves, perhaps, about their thinking and goals maybe. As a concern of artificial intelligence and mythology, the optimal path of life is a cosmic voyage as a captain of your boat on the river of Eden. But isn't this the embedded message of the Orion constellation in Egypt too? With 4 determinants in a 3D ether we have only a boat. But with 5 determinants, we have a boat with a captain in it. See also co-coordinating with a 3D inertia/reference (GIS) system.

	Have state of self consciousness and/or “computational/data structure state”	Work matters	Time matters	Energy/resources matter
Animals:	Yes	Yes	Yes	Yes
Humans and humanoids (and mutants):	Yes	Yes	Yes	Yes
Robots/drones and automated systems:	Yes	No	No	No (nuclear resources, free energy devices)
Computers (cybernetics):	Yes	No	No	No (nuclear resources, free energy devices)

By this concern, we have arrived to the rivalry of robots and industrial automation in general; in which system states are stored in memory in a continuous way (redundantly protected) and robots can sense about almost anything we want by modern day sensors. Now, by this practically challenging property; we realize, that robots or industrial automation can exchange people in vast functions and roles. As such “industrial revolution” have happened before the I-II World War too. That probably created the “idea of Wolfensteinian security” defense. Meaning, nuclear biophysics and artificial intelligence(AI) compatible/legitimate. The “deal” is the intellectual value of person vs. a robot or industrial automation solution. And its introduction to the monetary (healthcare) market and cryptocurrency markets (commodities). With such universal terms in mind, we can see that there is a clear and practical difference of people and robots/industrial automation on the market and in the economy. This, hence raises the social impact of pay, class differences and security. With the introduction of the monetary (healthcare) market and cryptocurrency markets (commodities); we have arrived to artificial intelligence (AI) compatible justice and law.

By this, the author refers to both healthcare as a monetary unit and cryptocurrency markets as commodities too. This also raises the question whether healthcare and the idea of crypto(nuclear economy) was justified prior to the I-IInd World War. See also the Spanish flu (Metabolism/biophysics) pandemic in 1918-1919 which killed up to 100 million people alone!

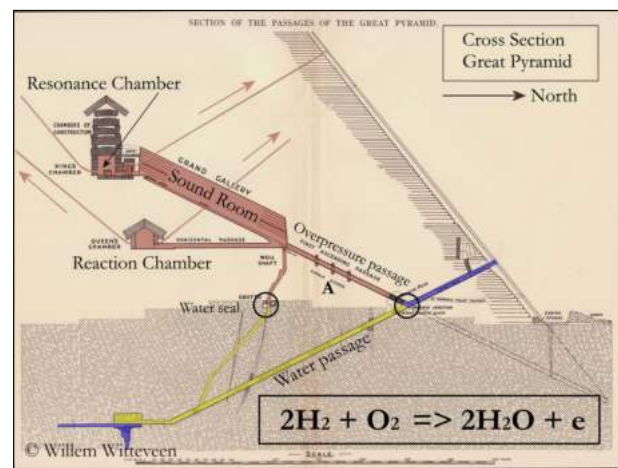

Such historic facts are indicators, that neither human healthcare nor the concept of a nuclear based economy have been solved on global levels. See also Cold-war, oil and energy conflicts. The study of energetics, cryo/RFID/plasma and economic propulsion systems of space programs.

<u>AI platform</u>	<u>Particulars</u>	<u>How they created?</u>	<u>Usage</u>
Dysfunctional	Beast or animal etc.	By mother nature.	Domestic or wild etc.
Plasma(Holy spirit) created natural creatures. (saints and prophets etc)	In physical harmony with nature. Symmetries. "Look good do good."	By mother nature.	Domestic etc.
Engineered AI compatible products or (creatures etc)	No symmetry or harmony necessarily but <u>functional and engineering operation.</u>	Engineering and computing.	Production oriented etc.
Nuclear plasma/AI created products and (mutant creatures etc)	A "shooter in time and space." Like the idea of AI enabled robots/transformers.	Engineering, computing and plasma physics.	Get a job done etc.

A new generation of products and mutant creatures? Symmetry surely did not work out in a socially and environment dependent manipulated driven world. Leadership requires asymmetry and dynamics rather than bondage to space, time and environment. We can differentiate by passive and active artificial intelligence (AI) enabled products and creatures. Based on engineering, computing and plasma physics.

By putting the above together, does nature or God left us a message that we should read out for taking our eternal human fate in hand? Well, a lot of people got mesmerized by the Orion constellation of the Egyptian pyramids the same way by the mythology of ancient civilizations. Practically and astronomy radio physics talking, the Orion constellation simply determines a space/time axis as a possible gateway, cosmic path to outer space.

A hypothesis of Egyptian pyramid sites. The Orion constellation and geophysics of Earth's and Sun's magma.

The hypothesis says that the ancient pyramids of Egypt were not created based on full nuclear knowledge and understanding. But a connection of star constellations trying to “mimic” a democratic society of ancient Egyptian civilization.

The hypothesis therefore questions whether the ancient Egyptian sites were fully nuclear aware in the knowledge of how to build a

cosmically stable site that was probably the motivation driven by the architects of ancient Egypt.

Hence, if the hypothesis is true, then we would have to examine and add further knowledge to the sites of Egypt in the knowledge of so called nuclear isotopic cyber-space. Many people might have thought that should the pyramids have a corresponding bottom side too?

Are the pyramids complete in their current form? Maybe if we want to build cosmic stability, better think in nuclear terms too. Or we might assume that if pyramid architects were digging down to lava levels of Earth's magma. Or have examined the Sun's magma too. See also nuclear energetics, cyber-space and geo information systems(GIS)

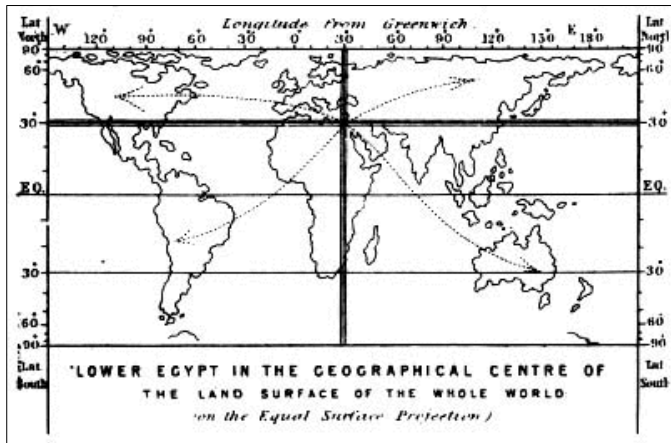

Better and more realistic stability could have been achieved. But did anyone ever investigate what is underneath the sites of Egyptian pyramids?

The Orion constellation is determined by three main stars above the pyramids. This cosmic constellation determines a walking human figure in the cosmos. See also Buddha statues. If the open society of construction workers of United States were a peacekeeping Freemasonry or other initiative from outer space to support stability, security and economy. Then really, as many say about the economy and politics. We only have just half of the story really.

If you look around all the Egyptian, Iron curtain etc sites were built in an "open air" fashion. Meaning, just half of the story "can be" true. If any of these initiatives were real, you would

have built a nuclear bunker of some kind but not a half legged installation from outer space etc. Are Arebico, Paranal etc also belong to these half legged installations from outer space? Do we live in delusion and overlook of what is really true and what really works anyways?

Geological measurements state that the gravitational center of planet earth lies in Cairo, Egypt. Which was the center of the ancient civilization. Theoretically, as more and more modern satellite measurements are made. It is proven that all physical geometries were maximized to enforce equilibrium states of cosmic stability.

The Orion star constellation that occurs approximately every 5000 years according to astronomers. What is interesting is that there are volcanoes on Mars too that also form a triangle constellation similar to the Orion star constellation in Cairo, Egypt.

Now, what is also interesting in this quest, is the following:

(1) There are also nature made pyramids on the Antarctic on the North-Pole of planet Earth. See enclosed photo of black pyramids on the North-pole of similar size to the pyramids in Cairo, Egypt.

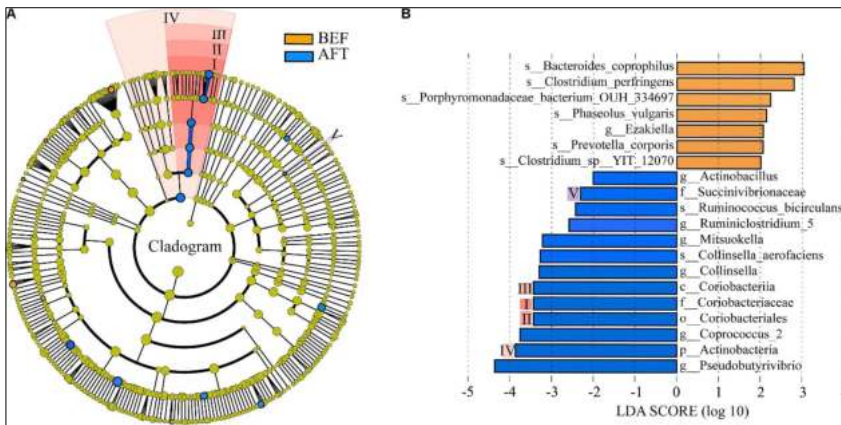

(2) There is also a human built looking pyramid on Mars but smaller than in Egypt.

(3) Middle-Earth as they say it is a judgment place out of cosmic anarchy? Was this Mars-Earth constellation the base of the once famous ancient Martian-Roman empire of the Romans and the Martians? Is the ego of humanity the block for a higher degree civilization? Serving the law and protecting order is a particular of intelligence.

The geometric size of the great pyramid of Giza in Egypt is 230 meters in base. The black pyramid of Antarctica has a base of about 250 meters. And both have a pyramid ratio geometry. Now, a hypothetical question raises weather prehistoric civilizations have measured and mapped the topological geometry of planet earth. And used it to build the pyramids of Egypt as a defense weapon, border gate against evil in the world. Similar to the idea of the Iron curtain in Austria, EU, Great wall of China or Stone Hedge in the UK.

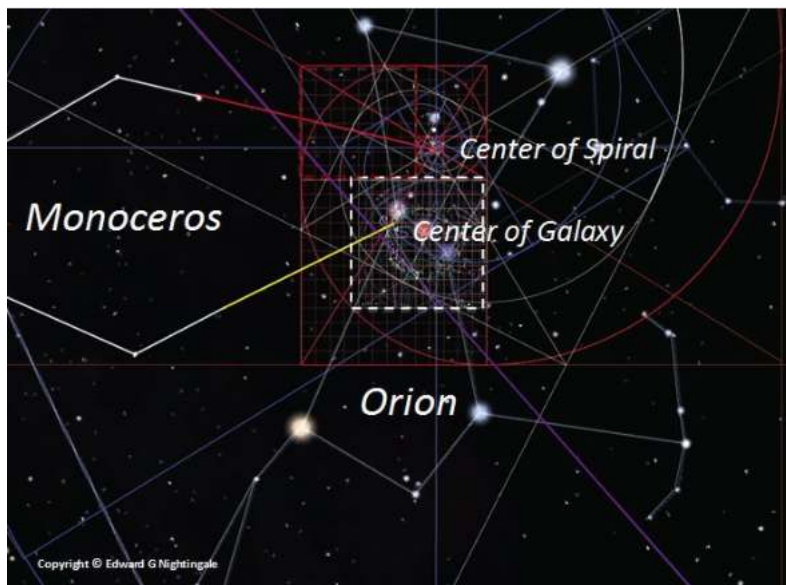

The Orion star constellation. The pyramids on the Antarctic and their possible radio-bio-pace relation with the Moon tidal-wave period. A cosmic physical-spatial system in superposition.

The Moon tidal-wave period and its ocean current alternations. Radio, the ether, water and gravity. System of force? The Lunar cycle is about 28 days. See also the **Clausius inequality** on states in a cyclic process. Also referred to as kinematic composite functions (kymatica). Also in Christ's monogram of self establishment, identification and the passage of time ahead (river of Eden) of the world.

$$\oint \frac{\delta Q}{T} \leq 0.$$

A relative map of the Orion star constellation to the galaxy. This gap in the alignment could cause the 5000 year cyclic period of the Orion star constellation. Since the Orion star-alignment is on an ecliptic orbit compared to the center of the galaxy. What kind of leadership could tackle such conditions? Physical impact of society and environment would require a liberated and autonomic leadership probably by robots or soldiers.

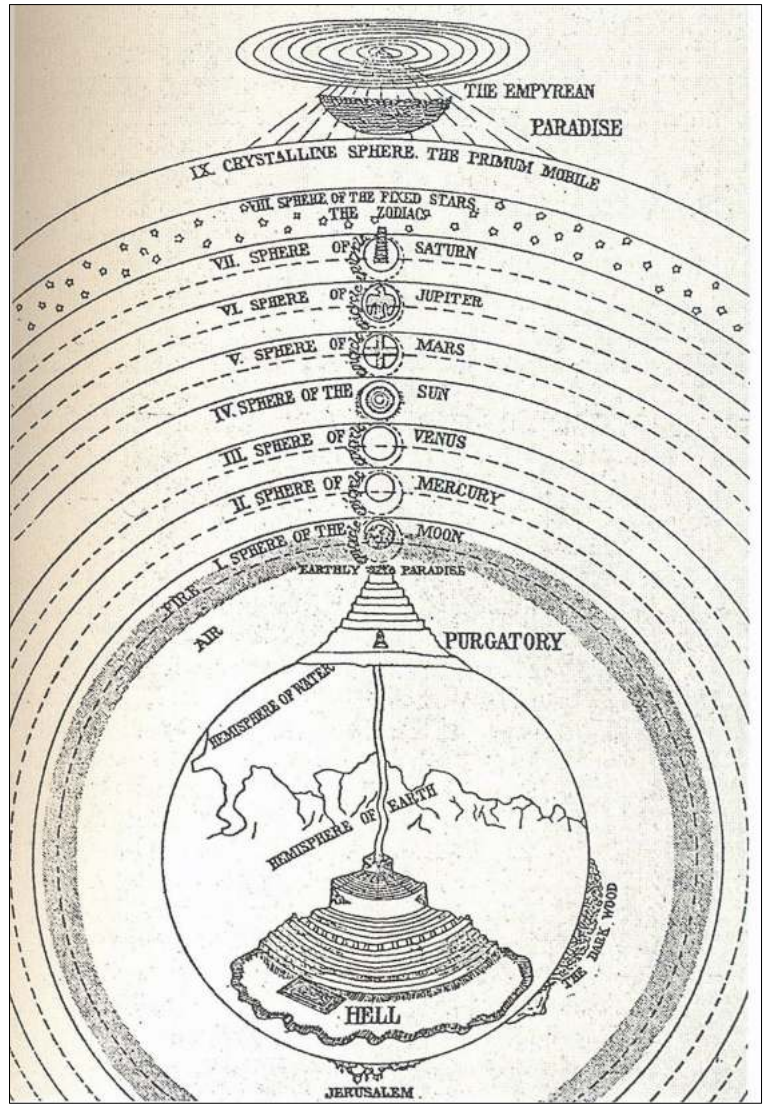

Is this the edge of the Roman-Martian (Babylon) ancient civilization by God's will? Do we understand our history? Or are thousands of Hollywoodian blockbusters just made of stories of lunatics? But aren't people believe and seek the path of justice too? What moral and ethical questions should we ask ourselves? Is Klendathu, Cybertron or Atlantis the way ahead?

Ref: Mars and its canyon with the volcanoes.

Ref: Jupiter, its gas stripes and its moons IO and Europa. Jupiter has 4 moons.

Could a dependable sublime state society stabilize our fragile and unstable society? Cosmic biometry of God's fingerprint in Genesis?

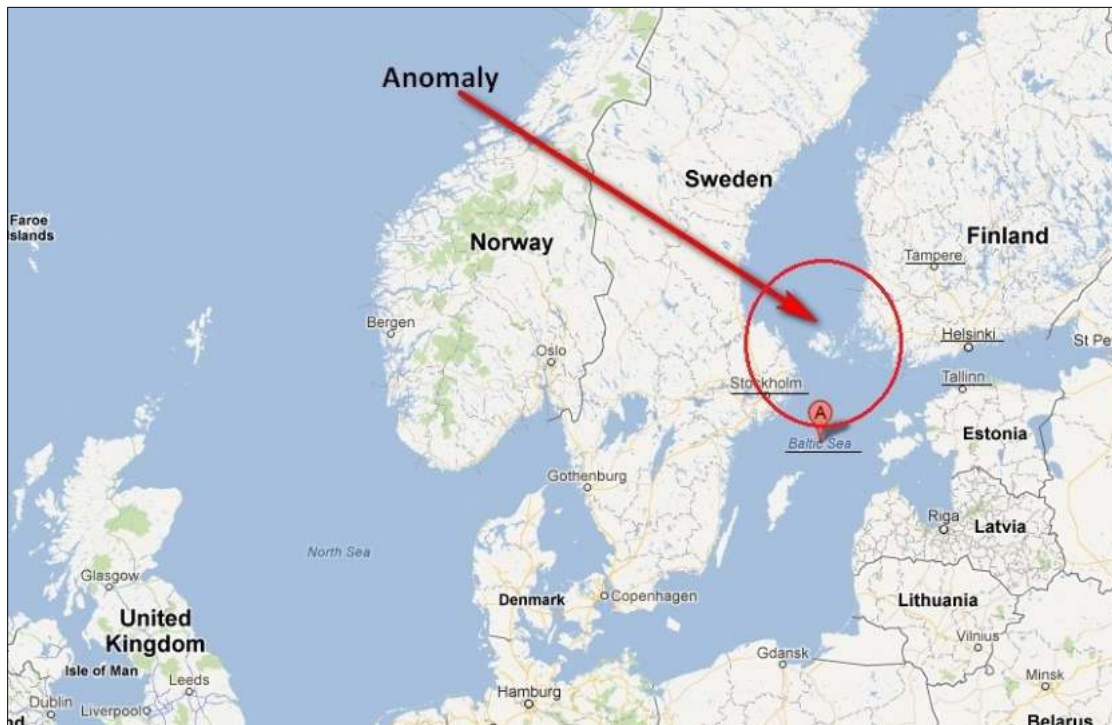

A hypothetical question would be if the once famous Roman-Martian (Babylon) empire could be the key to the cosmic presence of human civilization in space? Do the Bible and the Qur'an not talk about cultures of prophets such as Babylon and the Roman empire, but the prophecies of a turning point? Sublime vegetative worship of democracy and micro-cultures.

Could this social and economic layout be the stable future of social and economic growth? Reserved and contemporary leadership based on universal term knowledge and know-how.

Was there an ancient Egyptian Roman-Martian (Babylon) empire on Middle-Earth? The tower of Babel in Babylon (610-300BC, Baghdad, Iraq) of the time. Should we think different about representation of the level of degree of our civilization? Since we can observe that order and law converge energy(power) by principles. Then crystals, solitons or so called pyramids in higher order level (universal and cosmic level terms) are so called naturally available principle building blocks for higher order solutions by system perspectives.

Ref: 2 or more unidentified Millennium falcon spaceships were found by Peter Lindberg and Dennis Åsberg in the summer of 2011. Ocean X team found the 60-metre (200 ft) diameter circular objects in the Bothnian bay; within 300 kms of Stockholm, Sweden, EU of the Baltic sea bed.

Ref: Apollo 20 space initiative in August 1976 by US and Soviet (USSR) space program.

The Apollo 20 space program initiative was a US, USSR and South-Korean space co-operation supposedly. Was it a Maya spaceship of the Nazca highlands? Is the face on Mars the final human message we got from space or are there other historic and cosmic messages of our existence? Could it be true that once famous Roman-Martian-Babylonian empire have failed at the height of not being able to contact the planet of Atlantis?

Have the Roman-Martian-Babylonian empire not been able to reach extraterrestrial governments due to its civilizational underdevelopment? Does the key lie in the Orion star constellation

as a path to the cosmos? Could be good questions one might ask. If we don't think in universal terms after reaching a level of consciousness, what hopes we have in a complex and advanced world beyond order and trust of democracy? It is well known that the world is representing its state by mental projection in the real world. In astrophysical terms, the vacuum is a polarized and magnetic permeability(level of conductivity/magnetism) characterized cybernetic system(ether).

It does require a conscious and universal term reason to progress forward. However, on cosmic perspectives you realize that the ultimate truth basically represents itself in the state of the matter and consciousness indeed by laws. This process if fostered by catalysis particles such as charm particles. What one might want to recognize is that charm particles just supercharge the system with mostly revolutionary objects and entities(technologies, prophets etc.) But not yet form a conscious state from a human etc perspective but from the perspective of cybernetics of the ether. This is not something to ignore indeed.

Meaning, that catalyst particles such as the charm particle, do not discriminate themselves from humans or other entities necessarily but from the perspective of the system as a cybernetic unity of justice with or without consciousness. This is quite important, because you would think that humans etc would be the one and only creatures to be supported by such natural effects. The very truth is, you must understand the cybernetic meaning. As they say, “message of God.” also studied by theology and astrophysics of the heavens. Justice of the ether to figure the behavior of such cataclysmic processes. Ref: https://en.wikipedia.org/wiki/Darvaza_gas_crater

The river of Eden and the passage of time

The **Clausius inequality** of cyclic process is a formula that can describe the passage of time also referred to as the river of Eden.

$$\oint \frac{\delta Q}{T} \leq 0.$$

On planet Earth, the river of Eden is traceable about to the following path lines:

- (1) Masaya in Mexico/Barbados
- (2) Angel fall in Venezuela
- (3) Ivory coast of West-Africa
- (4) Nyiragongo volcano of Congo, Africa
- (5) Athens of Greece. (police means city in Greek)
- (6) Derweze gas crater in Turkmenistan

The river of Eden flows between the circles of the underground and upper democracy of ether in the justified field of electric annihilation. (law and truth)

Theoretically, the river of Eden flows at around 35 degrees of democracy and hell. The highest density of water is on +4C. It is possible to calculate the real or actual steepness of the river of the Eden as a mathematical model of the physical world by measuring magnetic components of both positive electric(positron) field and negative electric time domain.

From this negative/positive ratio, it is possible to calculate the actual degree steepness of the river of the Eden. Why is this important? By realistic measures, the current entropy of events is a stream of events that belong to each other by kinematic physical law relations. Simple differential equations that describe the worlds around us. Now, these polynomials form a system of equations that form/flow on the river of Eden. Like an ark on the passage of time. In scientific terms, the steepness of the river of Eden is not identified yet. But the author presumes that the relative difficulty of life could be around ratios of 3:5 or 6:9 by pentagon geometric shape and/or the circles of hell. Remember that pure water H²O is most dense at +4C.

Could circle 6 out of the 9 circles of Hell be the source of the river of Eden? A passageway out of Hell at circle 6 out of 9? The 9 circles of Hell, Purgatory and Paradise. And the passageway of the city of the dead (Circle 6 out of 9). Ref: Cairo, Egypt. The Orion star constellation. Is circle 6 (out of 9) the exit roundabout from the highway of Hell? A cosmic traffic system. Now, again, you realize that Jupiter's moon IO also seem to be a different moon in this respect. Does the moon IO of Jupiter belong to circle 6 of the 9 circles of Hell? Take exit 6 on the highway? Meaning, also the stripes of Jupiter? Cosmic highway in the ether? Is the plasma of charm particles (mesons) supercharges the cosmic order and create these navigation scenes for self-organization? Does the pentagon shape represent the flow of the river of Eden by the **Clausius** inequality? Looking at a pyramid from the inside?

And the passageway of the city of the dead (Circle 6 out of 9). Ref: Cairo, Egypt. The Orion star constellation. Is circle 6 (out of 9) the exit roundabout from the highway of Hell? The Richat structure in Mauritania, North-West Africa

This structure that has been present in our society for centuries. Is this another natural phenomena of cryo-technology and nature? Or is this structure really the feet of Atlantis planet's cryo-defense shield as many suspect? See also the Nazca lines in Peru, South-America. Ref: https://en.wikipedia.org/wiki/Nazca_Lines

Ref: https://en.wikipedia.org/wiki/Richat_Structure In other words, the world's consciousness is materialized in matter and the state of world indeed. Is the Richat structure a sign that cryo-technology (concentric circles) are also used in mother nature or perhaps by aliens in outer space? What hopes we have of finding the right path? Are the Cuban rocket crisis, Roswell, Ivory coast of Africa related to democracy and galactic law? We do not know yet if the concentric circles resemble Atlantic city's cryo defense shield.

Are Egyptian pyramids and the Orion star constellations related to the Richat structure? Or the Chariot Wheels of Babylon written in the Bible found in the Red Sea? Are the Chariot Wheels of Babylon related on India's or Romani people's flag? The Romas (also named Gypsy) came from India supposedly. Are Centaurs Gods in respect of humanity?

Photo below: Tree looking structures on Mars. Mars is also heavily studied by JPL NASA, UK SPACE, ESA, ROSCOSMOS and other space agencies.

The Shroud of Turin and the story of Christianity. If there are aliens and civilizations in outer space, do they believe in God as many books suggest?

Ref: https://en.wikipedia.org/wiki/Shroud_of_Turin

Ref: [The City of Luna, Chapel on the Moon and their history](https://en.wikipedia.org/wiki/Luna_City) illustrated. Thinking of it from a backward point of view. Cellular crystal development in rock. Does the law of physics repeats itself in nature and space? Order is power of the Lord itself. What other state could the world have than what it is conscious of indeed? Existence of order itself? Please also see my pocketFIT, FIT book and this document on the relationship between matter and consciousness and universal term thinking.

The story of the Freemasonry, Gulliver's travels and Babylonian-Roman empire. Quest of the Old Republic.

Democracy on planet Middle-Earth took place in Greece by Pericles. Pericles was a Greek politician who introduced voting based on the number of votes. This fundamental methodology of choice have become the foundation of democracy in ancient Greece and planet Earth. Now, what is interesting is the giant skeletons found under Athens on the Peloponnese peninsula called Nafplion. Giant humans of history. Was Nafplion on the Peloponnese peninsula the last hope of Gulliver (and Goliath) brother's of an Annunaki settlement in ancient Greece? Gulliver, Goliath and the Annunaki settlement all came from the same human origin. But did Gulliver ever visit planet Earth or was just a galactic traveler of a

giant Annunaki spaceship? The challenge of Hollywood vs reality, we have no information of such thing. Was the Annunaki settlement

on the Peloponnese peninsula in Greece an Egyptian effect of governance? Meaning, size and symbols, so called cryogenic interpretation drove ancient politics? That was revolutionized by Pericles after all? Continuing this story, the Freemasonry of United States and the United Kingdom also resemble an Egyptian type(cryogenic interpretation). Was Freemasonry the continuing extraterrestrial effort of Pericles's work etc? If it is true that Freemasonry was mostly an outer space effort. Does it mean that planet Atlantis was a founder of Freemasonry by the Richat structure on Earth? How do we know that none of this is fiction? We mostly have the Greek, Egyptian and Richat structure archaeological remains. This also meaning that critical mass/land is a principal determinant in the amount of cosmic information/path. This land/mass principle suggesting the we are really dealing with a cosmic fiasco. In which congregate mass/land, cryo-technology plots the cosmic path ahead indeed. This probably means that if we want to find the true cosmic connection, we would need to research starting with the Orion constellation of Cairo, Egypt.

VII. TABLE OF FORMULA SYMBOLS

Electric field

E	V/m	Electric field strength
D	As/m ²	Electric displacement
U	V	Tension voltage
b	V/m ²	potential density
ε	As/Vm	Dielectricity
Q	As	Charge
e	As	Elementary charge
τ₂	s	Relaxation time constant of the potential vortices

Magnetic field

H	A/m	Magnetic field strength
B	Vs/m ²	flux density
I	A	Current
j	A/m ²	Current density
μ	Vs/Am	Permeability
φ	Vs	Magnetic flux
m	kg	Mass
τ₁	s	Relaxation time constant of the eddy currents

other symbols and Definitions:

Specific electric conductivity	σ	Vm/A
Electric space charge density	ρ_{el}	As/m ³
Dielectricity	ε = ε _r · ε ₀	As/Vm
Permeability	μ = μ _r · μ ₀	Vs/Am
Speed of light	c = 1/√(ε · μ)	m/s
Speed of light in a vacuum	c₀ = 1/√(ε ₀ · μ ₀)	m/s
Time constant of eddy currents	τ₁ = ε/σ	s

Concerning vector analysis: **Bold print** = field pointer
