

Peacekeeping methodologies. A practical approach.

(Ver 5.8, Revision 5, Beta β)

- **Psychological conversion to reality** perception and living in presence: Spending 1-2 weeks in a forest camp site. Requires skillful preparedness accordingly!
- **Please read the CharmDSPChipVer4.3** (📄) **and ArtificialIntelligenceVer3.5** (📄) **documents.** These will change your thinking about the world around us.
- **Training on case-studies** rather than „passive” military exercises. Better focus and exposure to real threats in a practical way.
- **„Banking” towards confrontation.** Cyber-geography(CAD), muds and geo information technology (GIS) vs. Cyber-hype. Computer aided management(CAM) and Artificial intelligence(AI). This results in mobility, portability and equilibrium state.

Self establishing base rules:

Never support or credit the other side. Anything can be used against you. Always “bank” towards the combat zone or yourself. The world is a bank, we are building and “working on” a bank, regulated by democracy.

- If not sure about something, do not do it! Save the day!

- The ability to fix things is a golden path. Do not trade a used path for a risky unknown one.
- Use/make force with consciousness. By making and effort towards force, you are committing yourself to an act. This can prove or uncover (pro/contrary) your true identity under various conditions indeed.
- Become yourself in ambiguous situations. Resonance and judgment are golden in all ambiguity. Preserve energy, resources and heat of your inner circles. Resonance is golden path to build up the circles of justice. Your existential background.
- The best victory is a one that let go by law, rather than force. Force has remarks, void is golden in respect of peace and prospects. Democracy and politics leaves remarkable fingerprints in war and history too.
- Law and physics (defense) should solve the problems. Law is the only way to go (legal or physical etc). If an entity does not respect law, what chances we have of progress ahead? The idea of pirates and piracy by phantom shadow operations falls exactly outside of the perimeter of law and democracy! No identification → no authentication to the system of democracy. In a literacy way, you might say that by “divine poetry” of law. Engage in justification and take care of yourself.

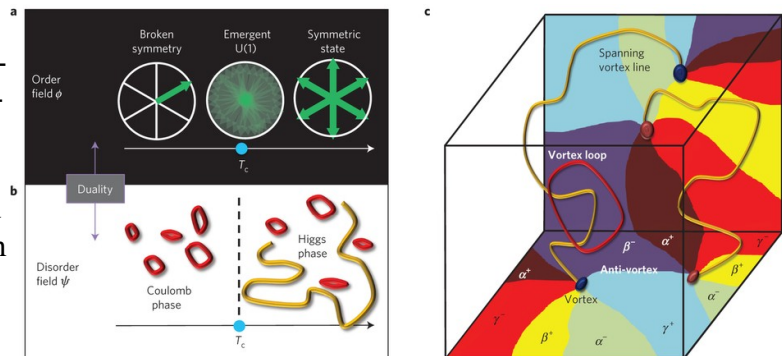

- How to possess weaponry and power? Survival and selection bears survival and selection too. In this process, you possess weaponry and power by being a locksmith of motherhood. Power and weapons will come to you. Worshiping the order of Lord is fame. There are three ways you can obtain possessions:
 - A: Work as a slave. Not normal.
 - B: Create something. Usual.
 - C: Take something from “law violator” by justice. Most economic.
- If not sure about what directions to take or choose. Go for power and higher numbers. By having resources and power, you have choices left. But if you loose on numbers and power, your options will be numbered too. Answers will come, resources and power are priority.
- The leadership. When trouble turns in and things turn out questionable, why “trade for the situation” and let backwards? Have to take leadership, and system, order will take care of the problems. If you keep control, control can take care of problems. But if you loose the control, what will take care of the problem? System and order works as well as control.
- Military wise, the smallest information comprise of a signal. The next military unit after a signal is an event. Once we have a signal, it can be used for communication or to trigger an event (Smoke sign, Morse-code or reaction..) See also wave interference and systems theory.

- The 888 rule. Keep the banking, stay at bay and save the cost. By law:
 - Do not cause damage that requires more than 8 days to recover by law. Both physical and mental. → Permanent or non-recoverable damage.
 - Stay within 80 kms (50 miles) of radius. On feet equals to a walking distance of 1 day or driving approximately an hour. Dehydration occurs exponentially; that will gradually degrade your capabilities over time.
 - Stay within 80 minutes (1h 20min) reach; so people can find you if you need help. So you can reach a telephone in 80 minutes for example. People can go 5 days without food; but must have access to water resources within 3 days.

Practically talking, AI is maximizing knowledge out of a given set of knowledge. By AI we do not just mean negation of information values but the process of maximizing it. Hence the word completeness. Once we achieved a complete set of knowledge of a given set of knowledge set, then we can say

that we have the complete knowledge set that can relate back to the base knowledge set. AI acts as a differential engine similar to differential gears in vehicles. Circle(canto) of Hell and ministry of the ether are not comparable to each other. But if you use AI and emulate the knowledge state, then you have life and death scenario of self manifestation in real world. Thus, AI can be used to camouflage self existence. CoP 1.0. Work put in/job got done ratio in respect of system of laws

Pericles ancient politician of Greece have said to vote based on numbers of justice. Could Greece be the ancient roundabout (Circle 6) from the dump of Hell? The principle building block of democracy are as follows:

- (1) Freedom of Information Act (FOIA)
- (2) Publicly Available Information (PAI)
- (3) The establishment of self identification based on commutative knowledge. Democracy of free choice. Knowledge of wisdom as one might say.

Russian bio robot Kollie of the 1920s.

Could automation and robotics solve power conflicts of the human factor kind? If we elevate our society to universal terms level on human factor and economic questions. Then could probably say that both I-IInd World War and a series of other human factor level con-

licts have got solved. Right now, most people refer to cars or mobile phones as something that identifies people. Which is not yet a universal replacement (salvation) to the idea of humanity and its consequential efforts and pains of the real physical/biological world. Could a dependent sublime state society stabilize our fragile and unstable society? Voodoo and sectarianism takes us nowhere.

Military tip:

Ref: Military is always concerned about oil and nuclear power as conflict matters. Democracy engineered in universal terms aka. polynomial units differentiated off the real world by abstraction.

Format of general second order equation. Example: **$ax^2+bx+c=0$**

See also music strings for modulus and derivation on further breaking down of equations/polynomials.

<u>Layers:</u>	<u>Military units:</u>
• Physical kernel (Atomic)	• Signal
• Logical kernel (Mathematical)	• Events
• Chemical kernel (Molecular)	• "Polynomial units" ⇒ Real world/thinking
• Biological kernel (Metabolic)	• System status
• Legal (Court)	⇒ Formula of relativity (relations) ⇒ Tensor equations (containers of values)

* **Alpha energy/plasma consciousness of physical world, including the spiritual world. See also DemonDSPChip document.**

General formula of polynomials of nth order:

$$a_n x^n + a_{n-1} x^{n-1} + \dots + a_1 x + a_0 \text{ where } a_i \in \mathbf{R} \text{ (} i=0,1,2,\dots,n), a_n \neq 0$$

The Quadratic Formula

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad \text{where } a \neq 0$$

For equations in quadratic form: $ax^2 + bx + c = 0$, we can use the quadratic formula to solve for the roots of the equation.

This equation is normally used when factoring is not an option.

Spatial intelligence and nuclear power.

Let's say that (Ref: CharmDSP chip Ver 4.3, Book of the Lord Ver 8.4, Artificial Intelligence Ver 3.5, <https://zoltanpdesign.wordpress.com/>) we can conclude, that terrorist cell networks breed on democracy by exploiting the plasma being unprotected in a parasite way. Meaning, that the plasma (Holy spirit) that protects our democracy is basically unprotected and exposable. With this in mind, using and living off the plasma and replicating every possible form of defense to maintain equilibrium justice in the world. In other words. Hell based terrorist cell networks breed and replicate on our democracy (supported by the Holy spirit, Ref: plasma) in a parasite way. Yet terrorizing and sabotaging our society and democracy.

A theoretical question could be this. If humans (people) can not sense their physical damage on their body. For example, someone bleeds or have got a virus

but still doesn't sense or knows about it consciously. Then we have the question whether people are conscious enough not just about the environment but about themselves too in serious manners. We can conclude that people are definitely not conscious about themselves, perhaps, about their thinking and goals maybe. By this concern, we have arrived to the rivalry of robots and industrial automation in general in which system states are stored in memory in a continuous

way (redundantly protected) and robots can sense about almost anything we want by modern day sensors. Now, by this practically challenging property; we realize, that robots or industrial automation can exchange people in vast functions and roles. As such "industrial revolution" have happened before the I-II World War too. That probably created the "idea of WolfEinsteinian security" defense.

Meaning, nuclear biophysics and artificial intelligence(AI) compatible/legitimate. Hence, what is the deal? The “deal” is the intellectual value of person vs. a robot or industrial automation solution. And its introduction to the monetary market (healthcare) and cryptocurrency markets (commodities). With such universal terms in mind, we can see that there is a clear and practical difference of people and robots/industrial automation on the market and in the economy. This, hence raises the social impact of pay, class differences and security.

	Have state of self consciousness and/or “computational/ data structure state”	Work matters	Time matters	Energy/resources matter
Animals:	Yes	Yes	Yes	Yes
Humans and humanoids (and mutants):	Yes	Yes	Yes	Yes
Robots/drones and automated systems:	Yes	No	No	No (nuclear resources, free energy devices)
Computers (cybernetics):	Yes	No	No	No (nuclear resources, free energy devices)

If we don’t think in universal terms after reaching a level of consciousness, what hopes we have in a complex and advanced world beyond order and trust of democracy? It is well known that the world is representing its state by mental projection in the real world. Sarajevo assassination Vs. Wardencllyffe Tower on Long Island New York City and I-IInd World War. In 1901 John Pierpont Morgan Sr. (J.P. Morgan Co) have signed an investment contract with Dr. Nikola Tesla to build the Wardencllyffe Tower on Long Island, New York City. But in 1914, the Sarajevo assassination have provoked the 1st World War and Tesla lost its business.

What kind of leadership could tackle such conditions? Physical impact of society and environment would require a liberated and autonomic leadership probably by robots or soldiers. The World War I-II lasted until 1945 with extreme devastation of 30 years of war. Did Dr. Nikola

Tesla not understood the concept of scalar wars (Metabolism/Spanish flu) by Fer De Lance means? Meaning its nuclear nature in conflict? In other words, the world’s consciousness is materialized in matter and the state of world indeed. Thinking of it from a backward point of view. What other state could the world have than what it is conscious of indeed? Please also see my pocketFIT, FIT book and this document on the relationship between matter and consciousness and universal term thinking. Sublime vegetative worship of democracy and micro-cultures. Could this social and economic layout be the stable future of social and economic growth? Reserved and contemporary leadership based on universal term knowledge and know-how.

Spy comment: Words and sentences(as in legal court) can be used against you as written in the CharmDSPChip document. See also electro-chemistry/fluxes and sol-i-ton~sol-u-tion→ $\Delta\tau$ on magnetic voltage”association”/current flux charge interpretation of the ether around us. (Radio interference and relative permeability of the vacuum/ether around us. Perceptual interpretive resonance.) (Ref: <https://zoltanpdesign.wordpress.com/>)

Subject matters: law, hell, democracy, Holy spirit(plasma), mesons, charm particles, quarks, evolutionary processes, genetic algorithms, energy, discrimination, racism, voodoo, sectarianism, psychology, conflict, reality, perception.
